

ZENTAKA INTERNAL DOCUMENT

Classification: RESTRICTED / INTERNAL SECURITY

Distribution Level: INCIDENT RESPONSE - OMEGA BLACK

Document ID: ZTK-INC-2091-1019-221

Program: Sentinel Vision / Aegis Loyalty Protocol

Subject: Field Incident - Unauthorized Mass Neutralization

Originating Dept: Internal Security / Risk Containment

Summary

On **19 OCT 2091**, during standard flagging operations in **Watson / Kabuki Transit Hub (Night City)**, Sentinel Vision algorithms incorrectly escalated multiple flagged individuals to **Tier 3 Neutralization** without Directorate authorization. The event resulted in **27 unplanned terminations** within the underground metro concourse.

This document records the incident, associated failures, and the corrective narrative distributed to external observers.

Timeline

- **14:22:07** - Flagging criteria activated after detection of prohibited keywords ("network," "resistance," **REDACTED**).
- **14:22:09** - 42 individuals flagged; of these, 27 elevated to Tier 3.
- **14:22:10-14:22:14** - Neuromuscular lockout engaged, followed by circulatory termination sequence.
- **14:23:00** - Security assets deployed for cleanup and witness control.
- **14:31:00** - Transit hub evacuated under cover of "gas leak" narrative.

Casualties

- Confirmed neutralizations: 27
- Collateral injuries: 14
- Surviving flagged individuals: 15 (currently under extended observation)

All subject records have been **altered retroactively** to indicate voluntary relocation.

System Analysis

- Root cause traced to **REV-7 miscalibration** of flagging protocols.
- Overlap between "compliance hesitation" and "proscribed terminology" produced erroneous escalation.
- Fail-safe override failed to engage due to latency in Directorate clearance servers.

Containment Measures

1. **Witness Management:** All civilian witnesses processed under memory disruption protocols (Bio-Sync v2.1).
 2. **Public Narrative:** Event disseminated as localized chemical leak, with victims reported as “gas intoxication.”
 3. **Data Redaction:** Surveillance footage looped with synthetic inserts; raw feeds destroyed.
 4. **Algorithm Update:** Hotfix applied to prevent multi-subject escalations without dual confirmation.
-

Compliance & Legal Note

Incident classified as “**statistical anomaly**” under Section 44 of Zentaka Risk Management. No disclosures required to external regulators.

Directive

No disciplinary actions authorized. The Board emphasizes that **rapid suppression outcomes outweigh collateral risks**. Continued deployment of Sentinel Vision + Aegis systems is authorized without limitation.
