

# ZENTAKA INTERNAL DOCUMENT

**Classification:** TOP SECRET / OMEGA BLACK  
**Distribution Level:** INTERNAL – EYES ONLY  
**Document ID:** ZTK-RND-20250322-014  
**Program:** Multi-Domain Human Optimization (MDHO)  
**Originating Dept:** Directorate of Biotechnical Research

## Executive Summary

This memorandum consolidates findings from ongoing trials conducted under the MDHO program umbrella. The stated objective is *behavioral and physiological compliance engineering*, with emphasis on the rapid suppression of dissent and maximization of asset utility.

Key deliverables remain unchanged:

- Full sensory override capacity.
- Long-duration emotional suppression.
- Conditional loyalty reinforcement.
- Deployment-ready neurological alteration vectors.

Incidents and fatalities are considered **acceptable within projected tolerances**. Legal risk is mitigated via **containment measures** and **systematic erasure of external witnesses**.

## Experiment Highlights

### 1. Bio-Sync Auditory Regression Trials

Subjects exposed to layered frequencies exhibited:

- Cognitive disassociation after 12–18 minutes.
- Memory overwrite when paired with visual strobing (≈87% efficacy).
- **Uncontrolled neural collapse in 22% of subjects.**

Note: Cleanup protocols were executed on schedule. Official reports list all casualties as *voluntary terminations*.

### 2. Project Ascendancy (Genetic Adjustment Units)

Unauthorized gene edits applied to workforce units show high yield in loyalty conditioning:

- Epigenetic silencing of fear-response pathways achieved in 61% of subjects.
- Aggression re-channeling successful but unstable; instances of uncontrolled violence noted.
- Long-term sterility a guaranteed outcome (not considered operationally relevant).

Directive: Concealment of adverse outcomes via false attribution to environmental toxins.

### 3. Sentinel Vision: Suppression Protocols

Surveillance grid integration tests confirm:

- Identification and flagging of non-compliant individuals within **0.7 seconds**.
- Automated silencing measures (electromuscular lockout via implant override) effective in **92%** of flagged cases.
- Collateral terminations categorized as *systemic noise*.

Legal countermeasures: All data routed through shell subsidiaries to ensure **deniability in external litigation**.

---

### 4. Aegis Loyalty Protocol – Directive 19

Direct cortical stimulation to enforce command obedience:

- 100% compliance in test units at Stage 4 stimulation.
- Severe psychological fragmentation observed; subjects rendered permanently non-functional outside direct command environment.
- Disposal recommended after 14–21 days of service.

Note: Ethics Committee **dissolved** following internal review; no further oversight applies.

---

## Risk Management Notes

- **Whistleblowers:** Neutralization protocols have been field-tested and remain reliable.
  - **Public Exposure:** Narrative control maintained through controlled leaks, media partnerships, and targeted discreditation campaigns.
  - **Legal Exposure:** Documents classified OMEGA BLACK are exempt from disclosure under Section 77 of the Zentaka Charter.
- 

## Directive

All research outlined above continues under **priority mandate**. The Board emphasizes **output over survivability**, noting that “subject attrition is an acceptable operational cost.”

End of Document.
